

Santiago E. Rene Bonetto

Full-stack web developer with focus on front-end, I have knowledge in JavaScript, React, Redux, React libraries, style libraries, knowledge in back-end with Express, PostgreSQL, Node.js. I had the chance to work in collaborative environments focused on the e-commerce industry where I could learn agile methodologies (SCRUM) and develop soft skills such as leadership being tech lead of the group, assertive communication and focus on results. I feel that the best decision I made was to combine my knowledge in sales with programming, thus achieving a more complete technical development.

TYPESCRIPT

FRAMEWORKS & LIBRARYS

PROYECTS

Dogs app (11/2022)

- Development of a Web App using React for the Front End and Redux as state management. All components were developed with CSS without the use of external libraries. The SPA consumes data from an API ("the dog api" <https://thedogapi.com/>) through a Back End developed in Node.JS using Express, adding new functionalities to the original API.

E-Commerce Exo-Otaku (01/2023)

- Participation in the development of an e-commerce project for a local store. In this project we used agile methodology (SCRUM) and once a week we shared the progress of the project with our Product Owner. In the FRONT we used React, Redux, MUI and other libraries; in the Back we used Node.js, Express, and for the DB we used PostgreSQL and Sequelize.

Raes Urbe - Negocio Inmobiliario (Actual)

- Web where you can find the property you are looking for in the real estate market. Intended for the franchise "Raes Inversiones". The programming language used is TypeScript, in the FRONT React, Redux, Chakra ui, among others. In the BACK Node.js, Express, MySQL and Sequelize.
